

## K-Line Sweepers

K-Line 820  
K-Line 1100  
K-Line 1200 pro  
K-Line 2000

- Robust Construction
- Hydraulic Drive
- Variable Speed
- Low Vibration
- Simple Operation
- Low Ground Pressure
- Simple Maintenance
- Easy Height Adjustment
- Truly Commercial
- Premium Engine Choice
- 5.5hp, 6.5hp, 9hp
- 75cm – 1.25 m wide
- Many Other Attachments
- Amazing Versatility

 Round Brush  
 Dust Suppression Kit  
 Reciprocating Mower  
 Salt/Grit Spreader  
 Trailing Seat  
 Stone Rake  
 Levelling Brush

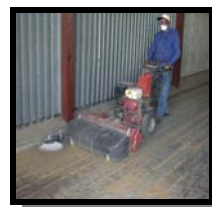

Weed brush attachment for cleaning block paving and edging

The Kersten K-Line series are more than just the most versatile external pedestrian sweeping machines on the market today. They are like a Swiss Army knife of estate maintenance equipment. The sweepers may be finely adjusted in so many ways, that have found uses in many applications; on hard surfaces like tarmac, block paving, concrete, timber and soft surfaces including grass, artificial grass sports carpets, horticultural cloths, rubber play surfaces to name a few. One day you may be sweeping debris from the surface of a sand filled artificial sports pitch and the next collecting cores from a golf green after having swept the car park. In addition to sweeping the K-line machines can become a hydraulic two wheel tractor with many attachments. As you progress through the range the more choice of attachments you can have.

These machines offer long service and low maintenance by using only premium components in their design and manufacture. Featuring an advanced hydrostatic drive system that allows the operator to change speed/direction effortlessly without clutching. This benefit means peak performance is maintained no matter how fiddly the job is. An integrated differential axle means the machine is easily manoeuvred around. Large diameter wheels offer a good ground clearance and amazing traction when the terrain gets tough. A simple quick attach system allows implements to be changed in seconds. Low noise and low operator fatigue also feature very highly in the design of all models. This versatility means Kersten sweepers are kept in use all year round with the ever increasing range of attachments available.
