

UBS – Two wheeled tractor unit

Above: A UBS with the reciprocating knife mower

Left: A UBS with the flail mower attachment. These range from 65cm to 135cm width

PERFORMANCE

The UBS hydraulic drive, two wheel tractors power units continue the range from the K series machines. In addition to most of the standard features found on the K 2100, the UBS machines incorporate a fully independent, heavy duty, mechanical power take off (PTO) drive to operate a wider range of more powerful attachments.

The "Hydro" transmission features automatic differential lock and "zero turn" powered steering. These machines can operate heavier duty pedestrian equipment with less operator fatigue.

- Various tyre options to suit different applications
- Machines range from 8hp to 18hp

RELIABILITY

Hydraulic drive with mechanical PTO means that a professional finish can be achieved in a multitude of applications.

The machines are built to the highest standard in Germany, with robustness and simplicity in design. The UBS comes with a one year professional warranty on all parts.

Briggs and Stratton Vanguard engine gives reliable performance and low vibration figures, allowing the machine to be used for hours at a time by an operator.

EASE OF USE

The Kersten Quick-Attach70 system allows the wide range of implements to be changed in seconds. Various tyre options may be added to suit the applications such as mulching on banks.

Options

- Electric start for petrol model
- Trailing sulky seat.
- Hand protection for handlebars
- Engine guard to protect the engine from debris
